Dear Graduates, Parents and Friends of Brown:

Resting on the edge of the Arctic Circle, Iceland is a realm of astonishing beauty where nature reigns supreme. Join us for this unforgettable exploration through Iceland’s vast wealth of magnificent scenery and fascinating cultural heritage.

During our specially designed, seven-night circumnavigation of this Nordic island nation, experience close encounters with Iceland’s primal landscapes and unique wildlife at the best time of year, when the midnight sun of the summer solstice melds into lingering twilight. Cruise aboard the exclusively chartered, Five-Star LE BELLOT, able to cruise into small ports inaccessible to larger vessels and to alter course as ethereal waterways, rugged fjords and magisterial glaciers unfold before you.

Explore cosmopolitan Reykjavik, the world’s northernmost capital and a vibrant example of Iceland’s egalitarian society. Visit seldom-toured islands and coastal hamlets where the mythic lore and epic sagas of Iceland’s national identity are passed down through generations. Cruise into Siglufjörður, cross the Arctic Circle on Grímsey Island, touch ice fragments calved from Breiðamerkurjökull in UNESCO-designated Vatnajökull National Park, and marvel at dramatic Goðafoss, the “Waterfall of the Gods.” Look for orcas and humpback whales as you cruise past Surtsey, a UNESCO World Heritage Site. Uncover the history of Iceland’s “Pompeii of the North” on fascinating Heimaey Island, where houses hemmed by hardened lava flow from Eldfell volcano are clustered beneath towering cliffs populated by multitudes of puffins, fulmars and guillemots.

This travel program includes Economy Class Air round-trip from Boston, New York-JFK, Newark, Toronto or Washington-Dulles; or Low Air Add-Ons for an additional \$200 per person from Chicago or Minneapolis; or Low Air Add-Ons for an additional \$300 per person from Denver or Seattle.<sup>††</sup> We will share this departure with alumni and friends from several other institutions, so I encourage you to reserve now, while space and early booking savings are still available.

Sincerely,

Beth Goldman Galer '88, P'25  
Director of the Alumni Travel Program

<sup>††</sup>Included Economy Class Air and Low Air Add-Ons have limited availability and are not guaranteed

**Faculty Lecturer**

The Brown Travelers program strives to include a representative of Brown on each trip, and we will make every effort to provide an outstanding faculty lecturer for this departure. However, group travel is planned far in advance, and given the current very fluid nature of travel, we cannot guarantee confirmation of Brown faculty participation on this program. If for any reason we are unable to send an accompanying lecturer, please be assured that our tour operators all share our belief that travel should provide an opportunity to learn about the world in deep and meaningful ways, and the educational content of this tour remains very high.

## PROGRAM HIGHLIGHTS

Námaskarð

## Land of Fire and Ice

A land of unparalleled geological riches, Iceland is home to 4,500 square miles of glaciers, 30 active volcanic systems, 800 hot springs, and over 10,000 waterfalls. Born of the monumental forces unleashed during the movement of the North American and Eurasian tectonic plates and carved out by formidable glaciers and incredible waterfalls, the land is a combination of intense natural energy and veritable calm. The topography of Iceland continues to evolve, yet many of its landscapes remain nearly unchanged since the first Viking settlers laid eyes on them more than 1,100 years ago.

During your circumnavigation, see volcanic craters and fissures, watch as bubbling hot springs erupt steam into the air against a backdrop of Mars-like terrain, encounter pristine waterfalls and black lava deserts, and witness the stoic majesty of mountains capped with snow and volcanoes slumbering beneath sheets of ice. Along the coast, Iceland's characteristic fjords chronicle the powerful path of the glaciers. Enjoy these natural wonders, in constant flux as glaciers calve and shift and new mountains emerge from volcanic lava flow. A startlingly beautiful portrait of Earth's history and progress, Iceland is a primordial landscape hewn by the forces of fire and ice.
